DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-7, drawn to a catalyst, classified in class 502, subclass 300+.
 - II. Claims 8-10, drawn to a catalyst and an exhaust gas purification system, classified in class 422, subclass 177.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions II and I are independent and distinct. Invention I requires an oxygen storage material defined by its capacity to release oxygen in a given temperature range while invention II requires an oxygen storage material defined by its capacity to enhance the ionization potential of the NOX absorbent material.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, recognized divergent subject matter and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.
4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement is traversed (37 CFR 1.143).
5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim

Art Unit: 1764

remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
